Subject: Rodenticide Hacco Question.
Date: 04/28/2011 09:04 AM

Good morning,

For the Hacco rodenticide products, I was wondering if any of you have readily available the answers to the following questions:

- How many of Hacco's registrations were amended to conform to the RMD requirements?
- Of these amendments, were any accepted with comments? If so, what were the comments?
- Did Hacco cancel any of their registrations and seek new registrations that conformed to the RMD? If so, which ones?

PRD is currently working on a response to Hacco's letter which expressed they may no longer comply with the RMD; and we want to be as specific in our response letter as possible.

Thank you again for all of your help on this!
